	Activity 4: Effective Literature Reviews Thorough and objective search through the state-of-the-art.
1.	Work on the literature review worksheet (<i>it is for you to keep</i>). What are some of the types or categories of approaches to your research problem?
2.	How did you identify these groupings? (Were they outlined in your reference paper, or did you notice patterns in the literature already?)
3.	Is your reference paper (or any paper you've identified to use) a <i>survey</i> paper?
4.	What is the next step in conducting your literature review?
